WOOD PARQUET

Stay Clean Technology

Stay Clean Technology

Prevent mud, spilled foods and other dirt from getting stuck:

- in the joints
in the texture of the wood

Making wood floors allows us to work with a material that is made beautiful by nature. However, wood floors can also be sensitive to discolouring from dirt and moisture. That is why we are proud to introduce the StayClean protection.

Other, untreated, wood floors can be penetrated by dirt and water, causing permanent discolouring. Pergo wood floors have protection that covers the entire facing of each plank. And with StayClean, all lacquered Pergo wood floors are extra resistant to liquids and spills, preventing dirt from getting into the joints and wood texture.

PERGO®

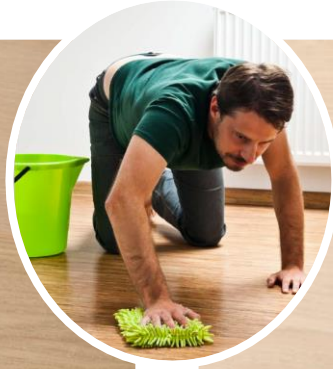

WOOD PARQUET

Moisture Protection Bevel

Moisture Protection Bevel

Extra Resistant to liquids

Other wood floors brands **without**
short side moisture protection

Pergo Wood floor **with**
short side moisture protection

The **treated short sides** prevents water from seeping in the wood
making the joints dirty & discolored.

The result is a floor that stays beautiful year after year!
